Reda obtained a Master's degree in Theoretical Physics, then a DEA of Geosciences and a Doctorate completed at the University of Rennes and at the Ecole des Mines of Paris where he started working before joining Elf Aquitaine, then IPEDEX.

He has been working for OPERA since its creation in 2002 and was appointed Director at the end of 2014.

His research works concentrate on geophysics imaging, waves propagation and the treatment of signal.
